OBJECTIVE

Detail-oriented Software Engineering graduate seeking an entry-level software engineering role to apply my programming and problem-solving skills. Passionate about building scalable applications, learning from experienced teams, and contributing to real-world software projects

WORK EXPERIENCE

Frontend Development Intern -Internship Pakistan | Remote

- Completed a remote internship focused on frontend development, building responsive and user-friendly web interfaces.
- Gained practical experience in responsive design, layout structuring, and frontend best practices.
- Collaborated on assigned tasks and strengthened skills in web development, problem-solving, and interface design.

RECENT PROJECTS

MoveWise (FYP) | (Flutter, Python, FastAPI, MediaPipe, Firebase)

- Developed an AI-powered fitness app with real-time posture detection, exercise repetition counting, and an AI fitness chatbot. Integrated MediaPipe Pose for posture analysis, personalized workout recommendations, progress tracking, and real-time exercise feedback.

MythBuster AI | (Python, Streamlit, Scikit-learn, FAISS, Groq API)

- Developed a conversational AI chatbot for myth analysis using Traditional ML, LLMs, and RAG. Implemented TF-IDF/SVM, FAISS vector search, and Llama 3.1 via the Groq API.

PrepNest AI - AI Interview Prep App | (Flutter, Dart, OpenAI API)

- Developed an AI-powered interview preparation app featuring AI-generated interview questions, mock interviews, technical quizzes, notes, reminders, and progress tracking. Integrated the OpenAI API for personalized responses and used Hive for offline data caching with Provider and Riverpod for state management.

EcoScan | Flutter, Machine Learning

- Developed a mobile app that identifies recyclable waste using image classification and provides sustainability recommendations. Emphasized performance optimization and clean application architecture

Travel to World App | (HTML, CSS, JavaScript, Firebase, Firestore)

- Developed a full-stack travel web app with user and admin panels, allowing users to explore destinations, request accommodations, chat, and post reviews while admins manage requests and listings. Implemented Firebase Authentication, Firestore, and real-time chat with a clean, responsive UI for a smooth user experience.

EDUCATION

Bachelor of Science in Software Engineering

Comsats University Islamabad Lahore Campus | 2022-2026
current CGPA =3.25

Related Coursework: Database Systems, Computer Networks, Web Development, Software Project Management, Mobile Application Development, Software Engineering, Artificial Intelligence, Data structure , Machine Learning

FSc in Engineering

Punjab College of commerce for Girls GT Road kamoke Gujranwala | Oct 2022

SKILLS

Tools: Microsoft | Excel | PowerPoint | Figma | GitHub | Postman | Android Studio | VS code | Canva | Google Collab

Technologies: Flutter | Firebase | Supabase | Node.js | UI/UX Design

Programming Languages: Dart | JavaScript | HTML | CSS | SQL | C | Java | Python

AI/ML: Machine Learning | Deep Learning | Computer Vision
